A Recursive Vision: Ecological Understanding and Gregory Bateson By Peter Harries-Jones

Gregory Bateson was one of the most original social scientists of this century. He is widely known as author of key ideas used in family therapy - including the well-known condition called 'double bind'. He was also one of the most influential figures in cultural anthropology. In the decade before his death in 1980 Bateson turned toward a consideration of ecology. Standard ecology concentrates on an ecosystem's biomass and on energy budgets supporting life. Bateson came to the conclusion that understanding ecological organization requires a complete switch in scientific perspective. He reasoned that ecological phenomena must be explained primarily through patterns of information and that only through perceiving these informational patterns will we uncover the elusive unity, or integration, of ecosystems.

Bateson believed that relying upon the materialist framework of knowledge dominant in ecological science will deepen errors of interpretation and, in the end, promote eco-crisis. He saw recursive patterns of communication as the basis of order in both natural and human domains. He conducted his investigation first in small-scale social settings; then among octopus, otters, and dolphins. Later he took these investigations to the broader setting of evolutionary analysis and developed a framework of thinking he called 'an ecology of mind.' Finally, his inquiry included an ecology of mind in ecological settings - a recursive epistemology.

This is the first study of the whole range of Bateson's ecological thought - a comprehensive presentation of Bateson's matrix of ideas. Drawing on unpublished letters and papers, Harries-Jones clarifies themes scattered throughout Bateson's own writings, revealing the conceptual consistency inherent in Bateson's position, and elaborating ways in which he pioneered aspects of late twentieth-century thought.

About the Author

Peter Harries-Jones is an associate professor in the Department of Anthropology, York University

Users Review

From reader reviews:

Charlotte Bernstein:

This A Recursive Vision: Ecological Understanding and Gregory Bateson book is just not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is usually information inside this publication incredible fresh, you will get data which is getting deeper anyone read a lot of information you will get. This particular A Recursive Vision: Ecological Understanding and Gregory Bateson without we comprehend teach the one who looking at it become critical in considering and analyzing. Don't possibly be worry A Recursive Vision: Ecological Understanding and Gregory Bateson can bring whenever you are and not make your case space or bookshelves' come to be full because you can have it in your lovely laptop even cell phone. This A Recursive Vision: Ecological Understanding and Gregory Bateson having fine arrangement in word as well as layout, so you will not really feel uninterested in reading.

Edward Carroll:

As we know that book is very important thing to add our knowledge for everything. By a reserve we can know everything we would like. A book is a list of written, printed, illustrated or even blank sheet. Every year has been exactly added. This book A Recursive Vision: Ecological Understanding and Gregory Bateson was filled about science. Spend your time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading a new book. If you know how big benefit from a book, you can feel enjoy to read a guide. In the modern era like now, many ways to get book that you just wanted.

Sherri King:

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library in order to make summary for some publication, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this A Recursive Vision: Ecological Understanding and Gregory Bateson can make you truly feel more interested to read.

Peter Landon:
