### PACES for the MRCP - E-Book: with 250 Clinical Cases (MRCP Study Guides) By Tim Hall

The 3rd edition of PACES for the MRCP has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training (CMT) and prepare candidates for success in the Practical Assessment of Clinical Examination Skills and a future specialty career.

#### Features

Fully revised for the new Station 5 and completely updated throughout.

Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar.

Emphasis on clinical assessment – history-taking, examination and communication skills – equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis.

Encourages candidates to question *why* a diagnosis has arisen and consider its consequences. For example, ‘Heart failure’ is not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely, and then considered its cause (not always ischaemic heart disease), its presentation (acute, chronic, left or right ventricular or both) and, most importantly, the effects of it and its treatments on a patient’s life.

This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success.

- A one-volume text giving candidates complete preparation for the PACES exam within one portable volume
- 250 cases organised into the 5 stations of the PACES exam – respiratory and

abdominal system, history taking, cardiovascular and nervous system, communication and ethics and skin, locomotion, eyes and endocrine systems

- Engaging question-and-answer approach at the end of each case – excellent preparation for the exam
- Boxed tips highlight vital information – helps identify what is most important to remember
  
- Produced in full colour throughout
- Colour coding for each station
- Many more illustrations added - now over 300 clinical photographs and line drawings in colour
- Many more cases added, bringing the number up to 250 - 50 per station
- History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

### **Editorial Review**

#### Review

Comments from candidates' reviews: "The book is an excellently designed companion to PACES preparation. It is portable enough to be carried around with you (unlike some other texts!), and removes some of the fear factor that can hamper preparation. I certainly used this book as my main text whilst on the wards and have recommended it ever since. I feel it is the best PACES text." "The book's format follows the format of the exam and helps to focus and get an idea what one needs to prepare for. It focuses not only on signs related to certain diseases, but also how to recognise and interpret these. As a second step it includes treatment/management to discuss the disease/case in the exam." "One of the greatest assets of this text is the positioning of relevant (and often asked!) questions at the end of this case. Even if studying alone it is possible to see a real patient and then test oneself on the questions practicing for the real exam experience. The close proximity of the answers (directly following the questions) aids readability, as some texts require you to seek out other pages. The competition lacks the questions which help you get good pass marks." "The miscellaneous section of 100 tips is motivating and all-encompassing! I often flicked to the back of the book throughout my preparation. It is also excellent for the night before the exam." "Hall's PACES for MRCP has comprehensive and up-to-date information presented in a very easy-to-read format. It quotes up-to-date studies. The content appears to be more comprehensive than any of the other PACES books out in the market that I have seen." *BMA Book Awards 2009 - judges comments*
