Processing for Visual Artists: How to Create Expressive Images and Interactive Art By Andrew Glassner

Learn how to create gorgeous and expressive imagery with the Processing graphics language and environment. It's easy with this practical, hands-on book. Processing is for artists, designers, visualization creators, hobbyists, or anyone else looking to create images, animation, and interactive pieces for art, education, science, or business. **Processing for Visual Artists** shows you everything you need to know in a friendly, project-based style designed for visual thinkers.

The projects can serve as a starting point for your own original, creative development and exploration. Walk with veteran author Andrew Glassner on a journey of shared discovery as he uses Processing to take each project from inspiration to reality. You'll closely follow every step he takes and see exactly how each piece evolves, including the big and small mistakes he's made along the way (and how to fix them!), and the times when he changed direction.

As your knowledge and skills grow and develop, you'll understand why Processing is such a powerful tool for self-expression. And you'll be ready to strike off on your own. Processing offers you a 21st-century medium for expressing new kinds of ideas and engaging audiences in new ways. This book gives you everything you need to know to explore new frontiers in your own images, animations, and interactive experiences.

Source code for each chapter is available for free download on the book's description at the crcpress website.

Editorial Review

Review

Processing for Visual Artists: How to Create Expressive Images and Interactive Art teaches how to create imagery with the Processing graphics language, created for artists, designers or any using to create images and animation for arts or business purposes. It provides a project-based organization designed for artists and other types of visual thinkers, showing how to use Processing to create successful results. The step-by-step focus for each piece builds on knowledge and skills and makes for a fine pick for engaging artists who have Processing and want to make the most of it!

?*The Midwest Book Review*, August 2011

The major contributions of this book are its uncompromising clarification of the creation of graphics using Processing and helping the reader to understand the principles underlying the language constructs to be used. ... the book has much to offer to an experienced programmer. I highly recommend the book for those who already write code, but want to extend their knowledge, to clarify concepts, to clean up bad practices they acquired elsewhere, and to improve their understanding in a richer context. The book is excellent for turning a beginning programmer into a self-confident and well-equipped one, who can not only admire and adopt, but also design and create expressive images similar to the ones discussed in the book.

?*Journal of Mathematics and the Arts*, August 2011

... quite accessible, using projects as platforms for teaching basics. A top pick, this includes color art image examples throughout.

?*The Midwest Book Review*, January 2011

If you are a visual artist looking to take your work on a new path, Andrew Glassner's new book is an exciting and incredibly comprehensive guide to using Processing to create imagery with computation.

?Daniel Shiffman, September 2010

About the Author

Dr. Andrew Glassner is a writer-director, and a consultant in story structure, interactive fiction, games, and computer graphics. He has carried out research in 3D computer graphics at Bell Communications Research, the IBM Watson Research Lab, Xerox PARC, and Microsoft Research. His many research papers and books cover theory and practice in fields such as 2D graphics, 3D graphics, interactive storytelling, and digital sound synthesis. His design work has been featured in locations from musical instruments and tattoos to iPhone applications to museum exhibits. Glassner is now a full-time writer-director and educator, and a consultant in storytelling and interactive fiction to the computer game and online entertainment industries.

Users Review

From reader reviews:

Carl Strum:

Book is actually written, printed, or highlighted for everything. You can realize everything you want by a publication. Book has a different type. As you may know that book is important point to bring us around the world. Close to that you can your reading ability was fluently. A book Processing for Visual Artists: How to Create Expressive Images and Interactive Art will make you to be smarter. You can feel far more confidence if you can know about anything. But some of you think this open or reading some sort of book make you bored. It is far from make you fun. Why they may be thought like that? Have you searching for best book or suitable book with you?

James Sellers:

Processing for Visual Artists: How to Create Expressive Images and Interactive Art can be one of your starter books that are good idea. Most of us recommend that straight away because this e-book has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The writer giving his/her effort to get every word into satisfaction arrangement in writing Processing for Visual Artists: How to Create Expressive Images and Interactive Art but doesn't forget the main place, giving the reader the hottest and based confirm resource facts that maybe you can be certainly one of it. This great information could drawn you into brand-new stage of crucial contemplating.

Donna Hoffmann:

That publication can make you to feel relax. That book Processing for Visual Artists: How to Create Expressive Images and Interactive Art was multi-colored and of course has pictures on the website. As we know that book Processing for Visual Artists: How to Create Expressive Images and Interactive Art has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book in your case and try to like reading this.

Elizabeth Johannes:

As a scholar exactly feel bored to reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just tiny students that has reading's heart and soul or real their leisure activity. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that reading through is not important, boring in addition to can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Processing for Visual Artists: How to Create Expressive Images and Interactive Art can make you experience more interested to read.
