The CDA TM book By Keith W. Boone

The CDA book provides clear and easy to use guidance to implement the standard, with numerous examples covering many of the nuances of the standard. Readers can learn not only how to implement healthcare IT using the CDA standard, but to "speak" in the language of the standard, and to understand its idioms.

Editorial Review

From the Back Cover

Clinical documentation is used throughout healthcare to describe care provided to a patient, communicate essential information between healthcare providers and maintain medical records. *The CDA Book* describes the HL7 Clinical Document Architecture Release 2.0 standard, a standard format for clinical documentation. It is thus intended for Healthcare Informaticists and IT developers, analysts and architects developing Healthcare applications working with all types of clinical documents.

“The Clinical Document Architecture (CDA) is a common container for assembly of structured and unstructured information that does not require creating numerous standards for individual document types. What has been missing to date is the educational materials to make CDA accessible to everyone. This book contains the documentation, samples, and guidance needed to successfully implement CDA in real world applications. It will accelerate adoption of CDA as a means to exchange structured data elements that not only capture the thought process of the encounter for care coordination but also can be stored as individual data elements for population health, research, and decision support.” John D. Halamka MD, Chief Information Officer at Harvard Medical School

About the Author

Keith W. Boone has been involved in the development of Health Level 7 standards including the HL7 Clinical Document Architecture since 2004. He co-chaired the HL7 Structured Documents working group from 2007 to 2010, which is the home of CDA in Health Level 7 International. He is presently a member at large of the HL7 Board.

Keith also co-chairs the Integrating the Healthcare Enterprise (IHE) Patient Care Coordination (PCC) planning committee which develops CDA Implementation Guides (which IHE calls profiles) for use internationally. He co-chaired the technical committee of that group from 2006 to 2009.

He also co-chaired the ANSI/HITSP Care Management and Health Records (CMHR) domain technical committee which developed the ANSI/HITSP C32 Summary Documents using CCD and the ANSI/HITSP C83 CDA Document Content Module specifications, and the Data Architecture tiger team which developed the ANSI/HITSP C152 Data Dictionary specification.

He also participates in other standards organizations, including the US Technical Advisory Group to ISO TC-215, ASTM and Continua.

Mr. Boone is a Standards Architect for GE Healthcare, where he is currently employed, and represents GE Healthcare to numerous standard organizations. He was introduced to IHE profiles and HL7 standards while working as a Chief Engineer at Dictaphone Corporation where he took on the role of leading that organization's efforts in standards. Before he developed an interest in the HL7 Clinical Document Architecture, Keith was a Software Architect for eBusiness Technologies, an XML technology company. There he was introduced to standards development, and worked alongside many of the co-chairs and developers of the XML specifications, including XML, XML Namespaces, XSLT, and XPath.

Users Review

From reader reviews:

Angela Harris:

This The CDA TM book book is just not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this reserve incredible fresh, you will get data which is getting deeper you read a lot of information you will get. This The CDA TM book without we understand teach the one who reading through it become critical in contemplating and analyzing. Don't end up being worry The CDA TM book can bring whenever you are and not make your case space or bookshelves' turn into full because you can have it within your lovely laptop even cellphone. This The CDA TM book having good arrangement in word and layout, so you will not feel uninterested in reading.

Jessica Sarmiento:

As people who live in the actual modest era should be revise about what going on or information even knowledge to make these keep up with the era which is always change and progress. Some of you maybe will update themselves by looking at books. It is a good choice for you personally but the problems coming to you actually is you don't know what type you should start with. This The CDA TM book is our recommendation to cause you to keep up with the world. Why, because book serves what you want and want in this era.

Robert Knight:

In this period globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to you personally is The CDA TM book this reserve consist a lot of the information in the condition of this world now. This particular book was represented so why is the world has grown up. The language styles that writer require to explain it is easy to understand. The actual writer made some exploration when he makes this book. Honestly, that is why this book suited all of you.

Steven Miller:

A lot of reserve has printed but it differs from the others. You can get it by internet on social media. You can choose the best book for you, science, comedian, novel, or whatever simply by searching from it. It is known as of book The CDA TM book. You can contribute your knowledge by it. Without departing the printed book, it can add your knowledge and make a person happier to read. It is most significant that, you must aware about publication. It can bring you from one destination to other place.
