### Life: The Science of Biology, Vol. 2: Evolution, Diversity, and Ecology, 10th Edition By David Sadava, David M. Hillis, H. Craig Heller, May R. Berenbaum

From its first edition, *Life* has set the standard for experiment-based introductory biology texts. There is no stronger textbook for helping students understand not just what we know (scientific facts), but how we know it (the experimental process that leads to their discovery).

The new edition of *Life* builds upon this tradition, teaching fundamental concepts and showcasing significant research while responding to changes in biology education...

- **PEDAGOGICALLY**, with features that match the way students learn today, including chapter opening stories, art with balloon captions, and new Learning Objectives
- **SCIENTIFICALLY**, with a wealth of important new research throughout (see Table of Contents for highlights)
- **TECHNOLOGICALLY**, with instant access QR codes printed in the text, new interactive features (media clips, chapter summaries, a flashcard app), and a dramatically enhanced BioPortal, with the adaptive quizzing system, LearningCurve
- **QUANTIFIABLY**, with completely revised assessment resources and new ways of measuring students' progress

Also available, Volume Splits:—paperbound in full color!

Volume 1: The Cell and Heredity (Chapters 1-20)

Volume 2: Evolution, Diversity, and Ecology (Chapters 1, 21-33, 54-59)

Volume 3: Plants and Animals (Chapters 1, 34-53)

- Sales Rank: #696776 in Books
- Brand: Brand: W. H. Freeman
- Published on: 2012-12-15
- Original language: English
- Number of items: 1
- Dimensions: 11.10" h x .87" w x 9.07" l, 2.95 pounds
- Binding: Paperback
- 389 pages

## **Editorial Review**

### About the Author

David Sadava, Claremont Colleges, USA David is the Pritzker Family Foundation Professor of Biology, Emeritus, at the Keck Science Center of Claremont McKenna, Pitzer, and Scripps, three of The Claremont Colleges. In addition, he is Adjunct Professor of Cancer Cell Biology at the City of Hope Medical Center. Twice winner of the Huntoon Award for superior teaching, Dr. Sadava taught courses on introductory biology, biotechnology, biochemistry, cell biology, molecular biology, plant biology, and cancer biology. In addition to "Life", he is the author or coauthor of books on cell biology and on plants, genes, and crop biotechnology. His research has resulted in many papers co-authored with undergraduates, on topics ranging from plant biochemistry to pharmacology of narcotic analgesics to human genetic diseases. For the past 15 years, he has investigated multi-drug resistance in human small-cell lung carcinoma cells with a view to understanding and overcoming this clinical challenge. At the City of Hope, his current work focuses on new anti-cancer agents from plants and fungi.

David Hillis, University of Texas, USA David is the Alfred W. Roark Centennial Professor in Integrative Biology and the Director of the Center for Computational Biology and Bioinformatics at the University of Texas at Austin, where he also has directed the School of Biological Sciences. Dr. Hillis has taught courses in introductory biology, genetics, evolution, systematics, and biodiversity. He has been elected into the membership of the National Academy of Sciences and the American Academy of Arts and Sciences, awarded a John D. and Catherine T. MacArthur Fellowship, and has served as President of the Society for the Study of Evolution and of the Society of Systematic Biologists. His research interests span much of evolutionary biology, including experimental studies of evolving viruses, empirical studies of natural molecular evolution, applications of phylogenetics, analyses of biodiversity, and evolutionary modeling. He is particularly interested in teaching and research about the practical applications of evolutionary biology.

H. Craig Heller, Stanford University, USA Craig is the Lorry I. Lokey/Business Wire Professor in Biological Sciences and Human Biology at Stanford University. He earned his Ph.D. from the Department of Biology at Yale University in 1970. Dr. Heller has taught in the core biology courses at Stanford since 1972 and served as Director of the Program in Human Biology, Chairman of the Biological Sciences Department, and Associate Dean of Research. Dr. Heller is a fellow of the American Association for the Advancement of Science and a recipient of the Walter J. Gores Award for excellence in teaching. His research is on the neurobiology of sleep and circadian rhythms, mammalian hibernation, the regulation of body temperature, the physiology of human performance, and the neurobiology of learning. Dr. Heller has done research on a huge variety of animals and physiological problems ranging from sleeping kangaroo rats, diving seals, hibernating bears, photoperiodic hamsters, and exercising athletes. Some of his recent work on the effects of temperature on human performance is featured in the opener to Chapter 40.

May Berenbaum, University of Illinois, USA May is the Swanlund Professor and Head of the Department of Entomology at the University of Illinois at Urbana-Champaign. She has taught courses in introductory animal biology, entomology, insect ecology, and chemical ecology and has received awards at the regional and national level for distinguished teaching from the Entomological Society of America. A fellow of the National Academy of Sciences, the American Academy of Arts and Sciences, and the American Philosophical Society, she served as President of the American Institute for Biological Sciences in 2009. Her research addresses insect-plant co-evolution from molecular mechanisms of detoxification to impacts of herbivory on community structure. Concerned with the practical application of ecological and evolutionary principles, she has examined impacts of genetic engineering, global climate change, and invasive species on natural and agricultural ecosystems. Devoted to fostering science literacy, she has published numerous articles and five books on insects for the general public.

## **Users Review**

### **From reader reviews:**

#### **Mary Bingham:**

As people who live in typically the modest era should be update about what going on or data even knowledge to make them keep up with the era which can be always change and progress. Some of you maybe can update themselves by studying books. It is a good choice for yourself but the problems coming to a person is you don't know what kind you should start with. This Life: The Science of Biology, Vol. 2: Evolution, Diversity, and Ecology, 10th Edition is our recommendation to help you keep up with the world. Why, because this book serves what you want and need in this era.

#### **Thomas Hodge:**

Now a day people that Living in the era where everything reachable by connect to the internet and the resources inside it can be true or not demand people to be aware of each facts they get. How people have to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Examining a book can help individuals out of this uncertainty Information mainly this Life: The Science of Biology, Vol. 2: Evolution, Diversity, and Ecology, 10th Edition book because book offers you rich info and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it as you know.

#### **Sarah Winship:**

Do you have something that you want such as book? The guide lovers usually prefer to choose book like comic, short story and the biggest one is novel. Now, why not hoping Life: The Science of Biology, Vol. 2: Evolution, Diversity, and Ecology, 10th Edition that give your enjoyment preference will be satisfied simply by reading this book. Reading addiction all over the world can be said as the means for people to know world a great deal better then how they react towards the world. It can't be explained constantly that reading routine only for the geeky person but for all of you who wants to become success person. So , for all you who want to start reading as your good habit, you may pick Life: The Science of Biology, Vol. 2: Evolution, Diversity, and Ecology, 10th Edition become your starter.

#### **James Voyles:**

Don't be worry if you are afraid that this book will filled the space in your house, you might have it in e-book means, more simple and reachable. This Life: The Science of Biology, Vol. 2: Evolution, Diversity, and Ecology, 10th Edition can give you a lot of good friends because by you considering this one book you have thing that they don't and make you actually more like an interesting person. This particular book can be one of a step for you to get success. This reserve offer you information that possibly your friend doesn't recognize, by knowing more than some other make you to be great individuals. So , why hesitate? Let's have Life: The Science of Biology, Vol. 2: Evolution, Diversity, and Ecology, 10th Edition.
