**Designing and Conducting Mixed Methods Research** By John W. Creswell, Dr. Vicki L. Plano Clark

*"The authors provided state-of-the-art information about mixed methods approaches to research. The book significantly expands Creswell's previous editions of mixed methods approaches to research by including four complete current studies that exemplify distinctive research using mixed methods...What becomes apparent throughout the book is the authors' interest in providing researchers with sufficient information about how to match their research problem to an appropriate design...I also highly recommend this book to anyone seeking to further their understanding of mixed methods research and acquire an in-depth analysis of the methodology."*

**-Patricia Montiel-Overall, The**

*University of Arizona*

**Designing and Conducting Mixed Methods Research** provides researchers across the social, behavioral, and health sciences with a comprehensive introduction to mixed methods research. Authors John W. Creswell and Vicki L. Plano Clark combine the latest thinking about mixed methods research designs with practical, step-by-step guidelines for the decisions that researchers face when designing and conducting a mixed methods research study.

## **Editorial Review**

### **Review**

*"This textbook, designed for graduate students and researchers, presents a clear and comprehensive guidebook for designing and conducting mixed methods research. One of the greatest strengths of this book for students and researchers is the inclusion of four complete published research studies in the appendixes. This is an excellent textbook for anyone interested in understanding mixed methods research. Although the target audience is graduate students, I believe that the text would be accessible and interesting to advanced undergraduates."* (Karl N. Kelley *Contemporary Psychology: APA Review of Books*)

### **About the Author**

Vicki L. Plano Clark, Ph.D., is a research assistant professor in the Department of Educational Psychology, co-director of the Office of Qualitative and Mixed Methods Research, and managing editor of the new *Journal of Mixed Methods Research* (Sage Publications) at the University of Nebraska-Lincoln (UNL). Her specialization includes mixed methods research designs and qualitative research. She is interested in the procedural issues that arise when implementing different designs and how mixed methods research is applied in different disciplines. She has co-authored numerous methodological discussions as well as empirical studies using qualitative and mixed methods approaches in science education, family research, and family medicine. In addition, she served as the Laboratory Manager in the UNL Department of Physics and Astronomy (1993-2005), working with the Research in Physics Education Group, and was a principal investigator on three National Science Foundation projects.

**John W. Creswell** is a Professor of Educational Psychology at Teachers College, University of Nebraska-Lincoln. He is affiliated with a graduate program in educational psychology that specializes in quantitative and qualitative methods in education. In this program, he specializes in qualitative and quantitative research designs and methods, multimethod research, and faculty and academic leadership issues in colleges and universities.

## **Users Review**

### **From reader reviews:**

#### **Melanie Tuck:**

This *Designing and Conducting Mixed Methods Research* are generally reliable for you who want to become a successful person, why. The key reason why of this *Designing and Conducting Mixed Methods Research* can be one of the great books you must have is usually giving you more than just simple reading food but

feed a person with information that probably will shock your prior knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed kinds. Beside that this Designing and Conducting Mixed Methods Research forcing you to have an enormous of experience like rich vocabulary, giving you tryout of critical thinking that we realize it useful in your day activity. So , let's have it and revel in reading.

#### **William Boehme:**

The reserve untitled Designing and Conducting Mixed Methods Research is the e-book that recommended to you to learn. You can see the quality of the e-book content that will be shown to you. The language that article author use to explained their ideas are easily to understand. The author was did a lot of analysis when write the book, therefore the information that they share to your account is absolutely accurate. You also could possibly get the e-book of Designing and Conducting Mixed Methods Research from the publisher to make you more enjoy free time.

#### **Robert Brown:**

The guide with title Designing and Conducting Mixed Methods Research has a lot of information that you can learn it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this book represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This book will bring you throughout new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

#### **Joseph Haner:**

Reading a book to be new life style in this yr; every people loves to study a book. When you go through a book you can get a great deal of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you wish to get information about your research, you can read education books, but if you want to entertain yourself read a fiction books, this sort of us novel, comics, in addition to soon. The Designing and Conducting Mixed Methods Research provide you with a new experience in studying a book.
