Phage Display: A Laboratory Manual By Carlos F Barbas III, Dennis R Burton, Gregg J Silverman

Phage-display technology has begun to make critical contributions to the study of molecular recognition. DNA sequences are cloned into phage, which then present on their surface the proteins encoded by the DNA. Individual phage are rescued through interaction of the displayed protein with a ligand, and the specific phage is amplified by infection of bacteria. Phage-display technology is powerful but challenging and the aim of this manual is to provide comprehensive instruction in its theoretical and applied so that any scientist with even modest molecular biology experience can effectively employ it. The manual reflects nearly a decade of experience with students of greatly varying technical expertise andexperience who attended a course on the technology at Cold Spring Harbor Laboratory. Phage-display technology is growing in importance and power. This manual is an unrivalled source of expertise in its execution and application.

Editorial Review

Review

The book's raison d' ea;tre is as a source of detailed protocols. These are clearly written, and include ideas for experimental controls and useful trouble-shooting notes. Jargon is generally avoided, and the protocols are up to date. ...[This] is a much-needed and well-executed attempt at theoretical and practical support to any researcher, established or novice, using phage display. Trends in Genetics This book is a solid work that addresses both theoretical and practical aspects of phage display technology. It covers the use of phage display in protein engineering with particular emphasis on antibody, peptide, cDNA libraries and ligand receptor engineering, which together represent [approximately] 90% of the phage display field. Anyone using or contemplating any of these applications would find it worthwhile to read the relevant chapters. Trends in Biotechnology --Cold Spring Harbor

From reader reviews:

Charlotte Maas:

Why don't make it to become your habit? Right now, try to ready your time to do the important act, like looking for your favorite publication and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the book entitled Phage Display: A Laboratory Manual. Try to make the book Phage Display: A Laboratory Manual as your good friend. It means that it can being your friend when you feel alone and beside that course make you smarter than before. Yeah, it is very fortuned for you personally. The book makes you a lot more confidence because you can know everything by the book. So, we need to make new experience along with knowledge with this book.

Christopher Ray:

The book Phage Display: A Laboratory Manual gives you the sense of being enjoy for your spare time. You should use to make your capable considerably more increase. Book can being your best friend when you getting tension or having big problem using your subject. If you can make examining a book Phage Display: A Laboratory Manual for being your habit, you can get more advantages, like add your own capable, increase your knowledge about some or all subjects. You could know everything if you like available and read a e-book Phage Display: A Laboratory Manual. Kinds of book are several. It means that, science reserve or encyclopedia or other people. So, how do you think about this e-book?

Timothy Roesch:

Phage Display: A Laboratory Manual can be one of your starter books that are good idea. We recommend that straight away because this guide has good vocabulary that may increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort that will put every word into enjoyment arrangement in writing Phage Display: A Laboratory Manual but

doesn't forget the main position, giving the reader the hottest and based confirm resource details that maybe you can be one of it. This great information can easily drawn you into brand-new stage of crucial considering.

Wilma Richards:

In this time globalization it is important to someone to find information. The information will make anyone to understand the condition of the world.
