They are, or were, much used by the Arabian Astrologers. But unless they agree with the nature of the primary directions in force at the period they fall out, they have but slight power. They are rarely in force beyond a week or ten days. To calculate Secondary Directions. Remark the time at which the D (or 0) forms any aspect with each other, or with any planets in the heavens. Then count the days and hours after the birth, and allow a year for a day, and a month for each two hours over the complete number of days. At that time, look for the effects of the secondary direction, which, if there be a primary direction within a few weeks of the time, will usually bring that primary influence to a climax. K?» The aspects formed by the luminaries with their own places and the places of the planets, the M.C. and the ascendant, are also found to have some slight effect. CHAPTER XII. Of Transits and Revolutions. A transit is the passing of any planet, or the Sun or Moon, over the place of any important point in the figure of birth, such as the place of the Sun, Moon, M.C., or ascendant, or of any one of the other planets. These transits are most powerful when they occur near or at the birthday. They are, however, subordinate to the directions at work at the time. T...
