Explosion Hazards in the Process Industries By Rolf K. Eckhoff

Explosions in the process industries injure or kill hundreds, if not thousands, of workers every year. They occur in process plants, refineries, platforms and pipelines all over the world. Millions of dollars are spent repairing damages, replacing equipment and rebuilding facilities in the wake of this destruction. This book explores different types of explosions that can occur in a facility and the necessary steps to guard against them. A clear set of preventative measures, rules and standards combine to make this book a convenient guide to real-world applications. Additional theoretical issues in the use of probabilistic equations and scenarios make this book an absolute necessity for process industry safety.

Editorial Review

About the Author

Rolf K. Eckhoff is Professor Emeritus of Process Safety Technology in the Department of Physics and Technology at University of Bergen, Norway. He is also concurrent professor at Northeastern University, Shen-yang, China, and Scientific Advisor at Oresund Safety Advisors AB, Malmo, Sweden. He is the author of *Dust Explosions in the Process Industries*, first published in 1991 with an extended version published in 2003. He is also the author and co-author of more than 150 technical and scientific publications and more than 130 research reports. He has advised Industry committees on numerous occasions, lectured to courses, conferences, and seminars in a number of countries in Europe, Bahrain, Israel, China, India, Australia, Canada, and the US. Dr. Eckhoff earned a Masters in Science in Chemical Engineering from the University of Trondheim, a Master of Philosophy from the University of London, a Doctor Technicae in Dust Explosions from the University of Trondheim, and a Doctor of Science (Eng.) degree from the University of London.

Users Review

From reader reviews:

Gail Kernan:

In this time globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can observe that now, a lot of publisher that print many kinds of book. The particular book that recommended to you personally is *Explosion Hazards in the Process Industries* this e-book consist a lot of the information in the condition of this world now. This book was represented how does the world has grown up. The dialect styles that writer use for explain it is easy to understand. Typically the writer made some analysis when he makes this book. This is why this book ideal all of you.

Anne Stewart:

Beside this particular *Explosion Hazards in the Process Industries* in your phone, it could give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh from the oven so don't always be worry if you feel like an old people live in narrow village. It is good thing to have *Explosion Hazards in the Process Industries* because this book offers for you readable information. Do you occasionally have book but you don't get what it's about. Oh come on, that wil happen if you have this inside your hand. The Enjoyable arrangement here cannot be questionable, such as treasuring beautiful island. So do you still want to miss this? Find this book and read it from now!

Charles Owens:

Is it you actually who having spare time after that spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This *Explosion Hazards in the*

Process Industries can be the respond to, oh how comes? A book you know. You are therefore out of date, spending your time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?

Kristen Wright:

That publication can make you to feel relax. This particular book Explosion Hazards in the Process Industries was colourful and of course has pictures on the website. As we know that book Explosion Hazards in the Process Industries has many kinds or style. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and think you are the character on there. Therefore , not at all of book tend to be make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you and try to like reading this.
