

Industrial Communication Technology Handbook, Second Edition (Industrial Information Technology)

From CRC Press

Industrial Communication Technology Handbook, Second Edition (**Industrial Information Technology**) From CRC Press

Featuring contributions from major technology vendors, industry consortia, and government and private research establishments, the **Industrial Communication Technology Handbook**, **Second Edition** provides comprehensive and authoritative coverage of wire- and wireless-based specialized communication networks used in plant and factory automation, automotive applications, avionics, building automation, energy and power systems, train applications, and more.

New to the **Second Edition**:

- 46 brand-new chapters and 21 substantially revised chapters
- Inclusion of the latest, most significant developments in specialized communication technologies and systems
- Addition of new application domains for specialized networks

The Industrial Communication Technology Handbook, Second Edition supplies readers with a thorough understanding of the application-specific requirements for communication services and their supporting technologies. It is useful to a broad spectrum of professionals involved in the conception, design, development, standardization, and use of specialized communication networks as well as academic institutions engaged in engineering education and vocational training.

Editorial Review

About the Author

Richard Zurawski, M.Eng, Ph.D, IEEE fellow, is with ISA Group, USA. He has over 35 years of academic and industrial experience, including a regular professorial appointment at the University of Tokyo, Japan. Since 1998, Dr. Zurawski has been involved in entrepreneurial activities in Silicon Valley. He co-founded three Silicon Valley-based hi-tech companies. A recipient of the IEEE Anthony J. Hornfeck Service Award and the Rector Medal from AGH University of Science & Technology, Dr. Zurawski served as vice president of the IEEE Industrial Electronics Society, and on the steering committee of the *IEEE Journal of Microelectromechanical Systems*. He has edited two book series and six major handbooks, as well as served as editor in chief of *IEEE Transactions on Industrial Informatics*, and editor at large, associate editor, and guest editor of many prestigious journals.

Users Review

From reader reviews:

Virginia Smith:

As people who live in often the modest era should be upgrade about what going on or information even knowledge to make these people keep up with the era that is always change and make progress.
