Thinking Tools for Kids: An Activity Book for Classroom Learning, Revised Edition

By Sally J. Duncan and Barbara A. Cleary

Thinking Tools for Kids: An Activity Book for Classroom Learning, Revised Edition By Sally J. Duncan and Barbara A. Cleary

This is the first book of its kind written especially for young people. It describes real-life challenges grade-school kids encounter and how they can be solved by a variety of quality tools. Beginning with an introduction to parents and teachers, the authors first summarize the book and explain how best to use it. Next, they identify the four main tools used in their teaching, and offer many examples and activities to aid in the students learning. Each chapter starts with a story that presents a problem that students or teachers may come across; the authors then explain which tools can be used to overcome these problems and also give examples of how to apply these tools to other problems. The many illustrations aid in the students' understanding of the tools they are using, while the helpful glossary aids the parents and teachers. At the end of each chapter the authors give a "home connection," which encourages kids to take what they have learned and apply it to problems at home. In addition, the authors suggest other books that may be of interest to the readers. New in this revised edition is the topic of data folders and data centers: how they support classroom learning, help to assess and record progress, and tie daily classroom tasks to long-term goals or expectations.

We all recommend that straight away because this guide has good vocabulary which could increase your knowledge in vocabulary, easy to understand, bit entertaining but delivering the information. The copy writer giving his/her effort to put every word into pleasure arrangement in writing Thinking Tools for Kids: An Activity Book for Classroom Learning, Revised Edition nevertheless doesn't forget the main place, giving the reader the hottest and also based confirm resource facts that maybe you can be one of it. This great information may drawn you into new stage of crucial imagining.

Robert McCauley:

As a student exactly feel bored to be able to reading. If their teacher requested them to go to the library or

even make summary for some reserve, they are complained. Just minor students that has reading's soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Thinking Tools for Kids: An Activity Book for Classroom Learning, Revised Edition can make you feel more interested to read.
