Traffic and Highway Engineering

By Nicholas J. Garber, Lester A. Hoel

Traffic and Highway Engineering By Nicholas J. Garber, Lester A. Hoel

The new edition of Garber and Hoel's best-selling TRAFFIC AND HIGHWAY ENGINEERING focuses on giving students insight into all facets of traffic and highway engineering. Students generally come to this course with little knowledge or understanding of the importance of transportation, much less of the extensive career opportunities within the field. Transportation is an extremely broad field, and courses must either cover all transportation modes or focus on specifics. While many topics can be covered with a survey approach, this often lacks sufficient depth and students leave the course without a full understanding of any of the fields. This text focuses exclusively on traffic and highway engineering beginning with a discussion of the pivotal role transportation plays in our society, including employment opportunities, historical impact, and the impact of transportation on our daily lives. This approach gives students a sense of what the field is about as well as an opportunity to consider some of its challenges. Later chapters focus on specific issues facing transportation engineers. The text uses pedagogical tools such as worked problems, diagrams and tables, reference material, and realistic examples to demonstrate how the material is applied.

Editorial Review

Review

"The book's strongest features are example problems, comprehensive coverage of diverse transportation engineering topics and a great selection of exercise problems."

"Complete and comprehensive coverage of transportation engineering topics by providing many examples and homework problems. Excellent coverage and illustrations on cindition prediction models and GIS application in pavement management."

About the Author

Nicholas J. Garber is a Professor of Civil Engineering at the University of Virginia where he has been a member of the faculty since September of 1980. Before joining the University of Virginia, Dr. Garber was a Professor of Civil Engineering in the Faculty of Engineering of the University of Sierra Leone, where he was also the Dean of the Faculty of Engineering. At the State University of New York at Buffalo, he played an important role in the development of the graduate program in Transportation Engineering. For several years, he was a design engineer for consulting engineering firms in London, and also worked as an Area Engineer and Assistant Resident Engineer in Sierra Leone.

Lester A. Hoel is the L.A. Lacy Distinguished Professor Emeritus of Engineering and the Director of the Center for Transportation Studies at the University of Virginia. He held the Hamilton Professorship in Civil Engineering from 1974-99. From 1974-89 he was Chairman of the Department of Civil Engineering. Previously he was Professor of Civil Engineering and Associate Director, Transportation Research Institute at Carnegie Mellon University and on the faculty at San Diego State University. He also was principal engineer with Wilbur Smith and Associates and visiting professor at the Norwegian Technical University and the University of California at Irvine and a visiting scholar at the University of California at Berkeley.

Users Review

From reader reviews:

Lee Nelson:

Book is definitely written, printed, or created for everything. You can realize everything you want by a publication. Book has a different type. To be sure that book is important factor to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A reserve Traffic and Highway Engineering will make you to possibly be smarter. You can feel far more confidence if you can know about almost everything. But some of you think that will open or reading some sort of book make you bored. It isn't make you fun. Why they could be thought like that? Have you in search of best book or suited book with you?

Lillian Thrasher:

What do you ponder on book? It is just for students because they're still students or the item for all people in the world, what best subject for that? Just simply you can be answered for that problem above. Every person has distinct personality and hobby for every single other. Don't to be compelled someone or something that

they don't desire do that. You must know how great and important the book Traffic and Highway Engineering. All type of book would you see on many resources. You can look for the internet methods or other social media.

Thomas Paine:

In this 21st hundred years, people become competitive in every single way. By being competitive today, people have do something to make them survives, being in the middle of the crowded place and notice by surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yes, by reading a guide your ability to survive boost then having chance to remain than other is high. In your case who want to start reading a new book, we give you that Traffic and Highway Engineering book as nice and daily reading guide. Why, because this book is more than just a book.

Edith Manning:

Now a day people who Living in the era everywhere everything reachable by connect to the internet and the resources included can be true or not involve people to be aware of each data they get. How people have to be smart in obtaining any information nowadays? Of course the correct answer is reading a book.
