Biostatistics and Computer-based Analysis of Health Data using Stata By Christophe Lalanne, Mounir Mesbah

This volume of the Biostatistics and Health Sciences Set focuses on statistics applied to clinical research. The use of Stata for data management and statistical modeling is illustrated using various examples. Many aspects of data processing and statistical analysis of cross-sectional and experimental medical data are covered, including regression models commonly found in medical statistics. This practical book is primarily intended for health researchers with basic knowledge of statistical methodology. Assuming basic concepts, the authors focus on the practice of biostatistical methods essential to clinical research, epidemiology and analysis of biomedical data (including comparison of two groups, analysis of categorical data, ANOVA, linear and logistic regression, and survival analysis). The use of examples from clinical trials and epidemiological studies provide the basis for a series of practical exercises, which provide instruction and familiarize the reader with essential Stata packages and commands.

- Provides detailed examples of the use of Stata for common biostatistical tasks in medical research
- Features a work program structured around the four previous chapters and a series of practical exercises with commented corrections
- Includes an appendix to help the reader familiarize themselves with additional packages and commands
- Focuses on the practice of biostatistical methods that are essential to clinical research, epidemiology, and analysis of biomedical data

Editorial Review

About the Author

Christophe Lalanne is a Research Engineer at the Paris-Diderot University, France. His research involves the modeling of data from clinical research

Mounir Mesbah is Head of Biostatistics in the Statistics Institute of the Pierre and Marie Curie University in Paris, France, where he is also a researcher at the Theoretical and Applied Statistics Laboratory. His research involves theoretical and applied statistics, particularly in the field of health and medicine.

Users Review

From reader reviews:

Catherine Crider:

The book Biostatistics and Computer-based Analysis of Health Data using Stata give you a sense of feeling enjoy for your spare time. You can use to make your capable much more increase. Book can to be your best friend when you getting pressure or having big problem together with your subject. If you can make looking at a book Biostatistics and Computer-based Analysis of Health Data using Stata to be your habit, you can get far more advantages, like add your current capable, increase your knowledge about some or all subjects. You could know everything if you like open and read a publication Biostatistics and Computer-based Analysis of Health Data using Stata. Kinds of book are several. It means that, science reserve or encyclopedia or other people. So , how do you think about this reserve?

Robert Reynolds:

Do you one among people who can't read pleasurable if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Biostatistics and Computer-based Analysis of Health Data using Stata book is readable simply by you who hate those perfect word style. You will find the details here are arrange for enjoyable studying experience without leaving actually decrease the knowledge that want to give to you. The writer of Biostatistics and Computer-based Analysis of Health Data using Stata content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the information but it just different available as it. So , do you even now thinking Biostatistics and Computer-based Analysis of Health Data using Stata is not loveable to be your top record reading book?

Millard Lopez:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their down time with their family, or their own friends. Usually they carrying out activity like watching television, going to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Could be reading a book could be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want

to try out look for book, may be the guide untitled Biostatistics and Computer-based Analysis of Health Data using Stata can be good book to read. May be it could be best activity to you.

Stacie Logan:

The book untitled Biostatistics and Computer-based Analysis of Health Data using Stata contain a lot of information on that. The writer explains the girl idea with easy means. The language is very easy to understand all the people, so do definitely not worry, you can easy to read the item. The book was compiled by famous author. The author provides you in the new era of literary works. You can read this book because you can continue reading your smart phone, or gadget, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site along with order it. Have a nice go through.
